EVERYTHING ABOUT IT SAYS: “DRIVE.”

All BMWs are designed and engineered for driving. That's in our DNA. But here is an all-new BMW model that is uncompromising in making the bold statement: “Drive me – now.”

The all-new, next-generation BMW 6 Series Convertible expresses the spirit of the driving enthusiast. It starts with a recasting of the now-classic 6 Series look. There's a wider, more aggressive stance, a long hood, crisp new accent lines and flared wheel wells – all of which play in concert to exude calm, yet unchallenged, command of the road.

This 6 Series' flowing beauty not only looks the part of a dynamic driver's 2+2, it delivers performance to match the promise of its fluidly muscular body. A 400-horsepower engine pours out heart-pounding acceleration. This is deftly choreographed with a lightweight chassis bristling with innovative, intelligent systems that inspire confidence at every turn.

Inside this brochure you will find tens of thousands of words describing this remarkable new BMW. Yet none are as powerful as the one you feel when you see the all-new 6 Series Convertible: Drive.

THE POWERFUL ALLURE
OF THE ENGINE START BUTTON.

The all-new 6 Series Convertible begs to be driven. So if you must get out every now and then to eat, sleep or merely stretch your legs, don't be surprised to find yourself looking back at the all-new 6 Series. Its powerfully sculpted lines and surfaces attract the eye – but its engine start button is irresistible to the driver.

The all-new BMW 6 Series Convertible evokes soul-stirring modern art in which every line and shape contributes to the beautiful effect.

ESCAPE THE BONDS
OF DRIVING BOREDOM.

Breaking away demands no small amount of horsepower. The 400-hp response of the 650i Convertible's 4.4-liter V-8 engine is nearly instantaneous. This is achieved through TwinPower Turbo boost, High Precision Direct Injection, and four overhead camshafts controlling 32 valves with exacting Double-VANOS steplessly variable valve timing. A slick-shifting 6-speed manual or 8-speed Sport Automatic transmission intelligently harnesses all this might to maximum effect.

Sprint to freedom: included with the 8-speed Sport Automatic transmission, steering wheel-mounted paddle shifters transform every drive into a sporting experience.

INDULGE YOUR PASSION
WHILE PRESERVING THE ENVIRONMENT.

BMW EfficientDynamics: solutions to sustainability challenges. BMW owners love driving – and the environment in which they drive. The aerodynamic all-new 6 Series Convertible satisfies these demands by combining high performance with low fuel consumption and emissions. The entire drivetrain, from engine to transmission, bristles with high-efficiency technologies – electronically controlled engine cooling is just one innovative example. Another is the 8-speed Sport Automatic transmission that makes the most of the engine's power in all gears. The drivetrain even enhances efficiency every time you take your foot off the accelerator: kinetic energy lost when coasting or braking is converted into electrical power via Brake Energy Regeneration.

Sustainability and precision is achieved through an advanced array of innovative technologies.

DESIRABLE BY DESIGN.

327 sports coupe – 1938. Elegance and aerodynamic efficiency were embodied in this streamlined model that represented the more progressive designs of the 1930s.

507 roadster – 1955.

The vehicle of choice for numerous celebrities, this sports car is also one of the most beautiful automobiles of its time.

Style has a long history at BMW. For more than 70 years, successive generations of convertibles and coupes have redefined timeless elegance.

Standards of beauty and success usually change over time. But there are some designs that seem impervious to change, becoming timeless classics instead. A case in point: BMW convertibles and coupes. For more than 70 years, they have combined dynamic performance, elegance and luxury. It's a tradition that began in the 1930s. The BMW 327 sports convertible and sports coupe had

style and presence. Even at that time, there were faster sports versions – the equivalents of today's BMW M models – powered by the six-cylinder engine of the Mille Miglia-winning 328, the original ancestor of all subsequent BMW sports engines. The large convertibles of the 1950s, on the other hand, impressed with their elegant design and light weight. Their elongated silhouettes, long wheelbases, set-back greenhouses, angled windows and characteristic kidney grilles became a part of BMW brand identity, and the defining style elements of today's large BMW Coupes and Convertibles. The timeless beauty of Count

3200 CS – 1962.
The successor to the BMW 503, this fast touring coupe was designed by Nuccio Bertone. It reached a top speed of 125 mph.

503 cabriolet – 1956. Count Albrecht von Goertz, a student of legendary industrial designer Raymond Loewy, created this elegant design.

Albrecht von Goertz's designs, such as the 507 roadster, found many famous admirers, from rock stars to rulers. In 1962, another unmistakable BMW design feature made its premiere in the 3200 CS: the "dog-leg" shape of the C-pillar, named the "Hofmeister kink" after its inventor, Wilhelm Hofmeister. In early models, up until the time of the first 6 Series, the widened base of the C-pillar was adorned with the BMW roundel. The 3200 CS owes the harmony of its proportions to another designer, however: Italy's Nuccio Bertone. There even is a single 3200 CS convertible, presented by the BMW Board of Directors as

a gift to the main shareholder, Herbert Quandt. In 1968, another luxury coupe was introduced: the 3.0 CSI, which is still considered a brand icon today. The 3.0 CSL, painted in 1975 as the first BMW Art Car Collection model, traded a degree of luxury and comfort for exceptional, sporty performance. Its low weight made it a pioneer of intelligent lightweight design. The 6 Series entered production in 1976. Designed by Paul Bracq, it marked BMW's increasing focus on comfort and safety features. Featuring many technical innovations, the 6 Series became a trendsetter. It was built for 13 years, longer than any other BMW model series. Its

most lauded model was the M635 CSI, introduced in 1984. It was powered by a 3.5-liter inline 6-cylinder engine with four valves per cylinder, two overhead camshafts and six individual throttle butterflies. Producing 286 horsepower at 6500 rpm, the basic design was derived from the legendary M1. At the 1989 Frankfurt Motor Show, BMW showcased a car featuring a futuristic design and leading-edge technology. Within a short period of time, the twelve-cylinder 8 Series coupe had found 5,000 buyers. It combined the shape of a sports car with the sumptuous appointments of a luxury sedan, and its innovative

BMW 8 Series – 1989. This luxurious coupe, powered by a 12-cylinder engine and pioneering technology, was also a design icon. It combined sports car dynamics and sedan comfort.

technologies and safety features set new benchmarks. 2003 saw the arrival of the second-generation BMW 6 Series. Like its predecessor, it was an elegant, luxurious automobile featuring pioneering technology. Its bold and dynamic appearance marked it as a milestone in BMW design. In addition to the Coupe, there was now also a Convertible. In Europe, the BMW 635d marked the entry of the first diesel engine in this segment.

WELCOME HOME.

From the first time you enter, it feels like it was custom-built just for you. Inside the all-new 6 Series Convertible, everything feels perfectly natural. This is not by chance. BMW designers and engineers pay particular attention to even the most minor details. From the interior's indirect ambient lighting, to the perfectly arrayed and angled instrumentation, to the carefully selected materials that delight to the touch, this is a cabin designed to make you feel comfortably in control.

Yes, those are golf bags – two of them – being stored in the trunk with the Convertible top down.

HERE, DRIVER AND PASSENGERS
BECOME HOST AND GUESTS.

Even after parking with the top down in the sun, the interior is the ultimate in comfort, thanks to leather seats with Sun-Reflective Technology and the ventilated front seats' cooling airflow.

This is one 2+2 in which everyone enjoys the ride. A welcoming environment is one in which extraordinary care is lavished on craftsmanship and detail. In the all-new 6 Series Convertible, natural wood trim surrounds 20-way power Multi-contour front seats available with ventilation. With the top down, even the darkest-colored Nappa Leather seats stay cooler thanks to Sun-Reflective Technology. Further enhancing your comfort is a climate control system that adapts to the individual needs of driver and passengers.

THE ART OF KEEPING YOUR EYES WHERE THEY BELONG.

In addition to vehicle speed and Check Control data, the new full-color Head-up Display can show Navigation system prompts, as well as warning messages from the Lane Departure Warning system and Night Vision with Pedestrian Detection system.

In 2003, BMW was the first European automotive manufacturer to offer a Head-up Display.

The concept of Head-up Display technology is to project essential information onto the windshield in the driver's field of vision. The projected image appears at an ergonomically ideal distance, seeming to hover above the front edge of the hood. The name of this technology speaks for itself: you can literally keep your head up. The system allows you to keep an eye on key driving information while staying focused on the traffic ahead – so looking at the instrument panel is rarely necessary. Understanding data projected by the Head-up Display takes only half as long as reading them off the instrument panel. This minimizes the risk of missing the brake-lights of a vehicle ahead, as well as potential hazards in the roadway.

The all-new 6 Series Convertible is the first BMW model to feature a full-color Head-up Display.

The new full-color Head-up Display projects all important information in the driver's direct field of vision. This lets you keep track of what's happening on the road ahead.

The term "eyes-off-the-road time" means the amount of time it takes you to read information displayed in a vehicle's instrument panel, such as current vehicle speed and Navigation system instructions. Depending on the complexity of the data, eyes-off-the-road time can last between one and three seconds. However, in just two seconds, a car driven at 62 mph will have traveled a distance of 182 feet with the driver unable to pay full attention to what's happening on the road.

The display is based on an optical effect.

The Head-up Display projector is positioned behind the instrument panel. The image is projected onto the windshield, and reflected by it. To you, the driver, it does not appear on the windshield itself – instead it seems to hover outside the vehicle, at a distance of around two and a half feet. This virtual lengthening of the viewing distance makes reading data off the Head-up Display much easier than consulting the instrument panel. Your eyes do not have to adjust from near to far, or adapt from the well-lit road to the darker displays in the cockpit. This increases comfort and reduces eye strain.

While previous versions of the Head-up Display showed only red, orange, yellow and green, the new system can display the entire color range. In addition to vehicle speed and Navigation instructions, the Head-up Display can show warning messages from driver assistance systems, such as the Lane Departure Warning and the infrared BMW Night Vision with Pedestrian Detection. The Head-up Display greatly reduces eyes-off-the-road time, providing an important contribution to active safety. You can access the Head-up Display features and adjust brightness and image position via the iDrive Controller. As a result, you can react faster in extreme situations – and you'll be less prone to fatigue.

From the driver's point of view, the Head-up Display seems to hover above the front edge of the vehicle's hood.

For details on the availability of standard and optional features, please refer to the **Equipment charts** at the back of this brochure.

“ENJOY TODAY. THINK OF TOMORROW.”

“I live a busy life. I travel a lot. Of course I think about the future, our environment, and the depletion of natural resources. And it looks like BMW shares my concerns. Over the past few years, the company has managed to lower the emissions of its vehicle fleet dramatically. And their vehicles deliver even more power and driving enjoyment from less and less fuel.”

BMW EFFICIENT DYNAMICS – TAKES LITTLE AND GIVES A LOT.

BMW is passionate about researching and developing systems that ensure advanced and efficient mobility. Which is why the all-new BMW 6 Series Convertible, like every BMW, comes with comprehensive, multi-award-winning BMW EfficientDynamics technology. BMW EfficientDynamics innovations reduce fuel consumption and CO₂ emissions while maximizing engine output and dynamic performance. Less fuel, more driving pleasure – a contradiction that BMW has resolved once and for all.

BMW EfficientDynamics Less emissions. More driving pleasure.

BMW Vision EfficientDynamics.

Imagine fuel-efficient vehicles that accelerate from 0-62 mph in a mere 4.8 seconds. Fuel-efficient vehicles that are extremely aerodynamic. Fuel-efficient vehicles that cause excitement even when parked. Sports cars that use only one gallon of diesel fuel per 62 miles. Sports cars that are fueled from a wall socket.

Fuel-efficient vehicles and sports cars like the **BMW Vision EfficientDynamics Concept car** make the impossible possible and demonstrate that a combination of highly efficient transportation and pure emotion can soon become a reality.

BMW TwinPower Turbo technology.

This innovative turbocharging technology efficiently reclaims the energy contained in exhaust gases, using two turbochargers in the BMW 650i, or a TwinScroll charger with a double-flow exhaust system.

High Precision direct fuel injection.

In this latest-generation direct fuel injection system, the piezo injectors are positioned very close to the spark plugs. They inject fuel at high pressure, with extreme precision, for very efficient combustion.

Double-VANOS valve timing.

BMW's VANOS valve timing system “steplessly” varies the points in the combustion cycle when valves open and close. Double-VANOS refers to the fact that it operates on both the intake and exhaust camshafts. Electronically controlled in response to engine speed, temperature and load, it reduces emissions, and enhances low- to medium-speed torque, as well as fuel efficiency.

8-speed Sport Automatic transmission.

The close spacing of gear ratios in this 8-speed Sport Automatic transmission makes maximum use of the optimum rev range, reducing fuel consumption and allowing smoother shifts.

Electric Power Steering.

Unlike conventional, hydraulic steering systems, Electric Power Steering draws power only during actual steering movements. When the steering wheel position is constant, the electric motor is inactive.

Optimized fuel efficiency.

BMW EfficientDynamics enables every BMW engine to provide maximum power while using a minimum of fuel. In the BMW TwinPower Turbo V-8 engine, two parallel turbochargers are positioned between the cylinder banks. This compact design with shorter intake paths provides power and performance at a previously unattainable level.

Brake Energy Regeneration.

In vehicles with Brake Energy Regeneration, the alternator generates electricity only when the driver takes his or her foot off the accelerator. Kinetic energy that was previously unharnessed is transformed into electrical energy, which is then fed into the battery. In this way, electricity is generated without consuming fuel.

IT ALL REVOLVES AROUND YOU. SEVERAL THOUSAND TIMES PER MINUTE.

Engines that power innovation. Year after year, BMW engines have garnered accolades for their output, refinement and high-revving ability. Beneath the long hood of the all-new 6 Series Convertible is one of the world's most sophisticated engines. It is designed to deliver on BMW's EfficientDynamics philosophy: increased power with decreased fuel consumption and emissions. You'll enjoy the thrill of BMW performance while helping to protect the environment every day.

BMW 650i. BMW's 4.4-liter TwinPower Turbo V-8 is the essence of an iron fist in a velvet glove. Calling on two parallel turbochargers, its robust 400 hp accelerates the 650i Convertible smoothly from 0 to 60 mph in 4.9 seconds,¹ while the boost from 450 lb-ft of peak torque is sustained from 1750 all the way to 4500 rpm. Thanks to High Precision injection, this V-8 is also extremely fuel efficient.

THE BEST FOUNDATION FOR DYNAMIC PERFORMANCE: A SUPERIOR CHASSIS.

The all-new BMW 6 Series Convertible can be equipped with a whole host of innovative technologies to help you get the most out of each drive. Many of these systems are intelligently networked with each other, maximizing your active safety quotient – and your driving pleasure.

Integral Active Steering. At speeds of up to 30 mph, with Integral Active Steering, a small turn of the steering wheel yields a greater turn of the front wheels for more direct response. This feature also steers the rear wheels up to 2.5 degrees in the opposite direction, giving the effect of a shortened wheelbase for enhanced maneuverability. When changing lanes at speeds over 50 mph, both front and rear wheels turn in the same direction, giving the feel of an extended wheelbase. While you experience greater responsiveness and directional stability, your passengers enjoy greater ride comfort from reduced body roll.

8-speed Sport Automatic transmission. This transmission adjusts to your style – from comfortable cruising to very dynamic driving. To change gears, you can use the selector lever or steering wheel-mounted gear shift paddles. In Sport mode, modified clutch settings allow very quick adjustments in engine speed, for minimal shift times. The close spacing of the eight gears optimizes acceleration, while also maximizing efficiency and comfortable shifting.

Driving Dynamics Control. In vehicles equipped with the 8-speed Sport Automatic transmission, you can adjust the driving characteristics by simply pressing a button. Choose from four settings, COMFORT, NORMAL, SPORT and SPORT+, to adjust engine-throttle response, transmission shift characteristics, and power-steering assist. In addition, the traction control feature can be disengaged when driving on sand, gravel, or deep or packed snow.

Dynamic Damping Control. Ride-enhancing Dynamic Damping Control instantly adjusts shock absorbers from the softest to the firmest settings. The result is exceptional ride comfort and fluid handling at all times – during changes in vehicle speed, load, or road and driving conditions.

Active Roll Stabilization. A vehicle's body tends to roll in corners, affecting handling. Performance-elevating Active Roll Stabilization (ARS) twists special two-piece anti-roll bars to generate stronger resistance to body roll, keeping the vehicle more level and providing maximum stability and agility.

For details on the availability of standard and optional features, please refer to the **Equipment charts** at the back of this brochure.

¹ BMW AG test results. BMW urges you to obey all posted speed laws and always wear safety belts.

HIGH-TECH BODYGUARDS: ACTIVE AND PASSIVE SAFETY.

The all-new 6 Series Convertible is designed with BMW's full range of standard state-of-the-art active and passive safety technologies. Active safety features, such as Xenon Adaptive Headlights, a powerful engine and large brakes, help you see and respond to potentially dangerous situations. Should an accident prove unavoidable, passive safety features, such as airbags and Rollover Protection, are designed to help protect you and your passengers. After a severe impact, a host of features spring into action: the doors automatically unlock, and headlights and taillights flash; the starter cable is disconnected from the battery and the fuel supply is cut off. Should any airbags deploy, BMW Assist™ response specialists are automatically alerted and notified of your location.

■ **Dynamic Stability Control (DSC).** This system provides remarkable tenacity on slippery road surfaces. If it senses over- or understeer, it modulates engine power and can apply brakes individually to help keep the vehicle under control and going in the intended direction. Start-off Assistant, a feature of DSC, prevents the vehicle from rolling backward on a hill for 1.5 seconds after taking your foot off the brake. The system also includes Brake Fade Compensation, which lets you use the same amount of pedal force, even when the brakes are heated; Brake Stand-by, which pre-tenses the brakes for quicker action if you suddenly remove your foot from the accelerator pedal; and Brake Drying, which, when it rains, periodically brings the brake pads into contact with the rotors to eliminate accumulated moisture.

■ **Dynamic Traction Control (DTC).** This sub-function of Dynamic Stability Control raises the threshold for engine and braking intervention. Activated by simply pushing a button, this traction mode allows increased yet controlled wheelslip, helping to improve propulsion in deep snow or sand. When activated, it also allows the driver to enjoy an even sportier driving style.

■ **Body stiffness.** The intelligent use of high-strength multi-phase steel and aluminum provides a high degree of body stiffness and crash resistance. Components, such as the A-pillars and windshield frame, include special reinforcements to provide optimum occupant protection.

■ **Xenon Adaptive Headlights** for low- and high-beams enhance illumination of the road ahead at night or in poor visibility. Four LED Corona headlight-surrounds, which can be used as Daytime Running Lights, also serve as parking lights. Adaptive Headlights provide optimum illumination of the road ahead when the car enters a turn. Light distribution is automatically adapted to the road speed and steering angle. Cornering Lights, positioned in the two inner headlights, are automatically activated by using the turn indicator or changing the steering wheel angle, even when the vehicle is at rest.

■ **Airbags.** In the event of a collision, BMW's supplemental restraint system (SRS) determines which airbag(s) to deploy for optimal protection. When a safety belt is used, airbags deploy only at a higher crash severity; the force of the deployment depends upon the severity of the impact. Four airbags offer specific protection: front airbags with advanced technology for driver and front passenger, and front-seat-mounted side-impact airbags.

Note: These pictures of airbags are for illustrative purposes only. Depending upon the type of accident, none, some or all airbags may deploy.

■ **Active Head Restraints** in the front seats reduce the risk of whiplash or neck/head/spine injury. When sensors detect a rear-end collision, the headrests rapidly and automatically pivot forward, supporting the driver's and front-seat occupant's heads.

■ **Rollover Protection System**, together with the reinforced A-pillars and windshield frame, is designed to create an occupant "safety cell." Highly accurate sensors continually monitor vehicle angle, longitudinal and lateral acceleration, and amount of ground contact. When data indicate a rollover is imminent, rollover bars integrated behind the rear-seat headrests are deployed. Within fractions of a second they spring up and lock into place, helping to withstand rollover forces.

■ **Run-flat tires.** Thanks to reinforced sidewalls, run-flat tires maintain their shape and rim position even after suffering a complete loss of pressure. In fact, you can drive up to 150 miles at reduced speeds, so you don't have to stop in an unsafe area to change a tire or wait for Roadside Assistance. The Tire Pressure Monitor alerts you when there is a drop in tire pressure; if the loss is severe, an acoustic warning is triggered.

TOP-DOWN SOPHISTICATION IN JUST 19 SECONDS.

The all-new BMW 6 Series Convertible comes with an exclusive, elegantly designed softtop. Its advanced design ensures quick, silent operation – and unique benefits.

The sky above, the road ahead: this is the freedom and romance of a convertible, made even more delightful when the convertible in question is the all-new BMW 6 Series.

Top-down, the long, shapely silhouette radiates pure elegance. Raise the softtop, and the Convertible's unique "fin" roof creates a silhouette that is nearly indistinguishable from that of a BMW Coupe, preserving the hallmark BMW proportions and typical window design in every detail.

The unique softtop design, with its two fins resting on top of the storage compartment, allows for another special feature: a vertical glass rear

window that can be raised and lowered independently of the softtop at the push of a button. This rear window can be electrically heated, for optimum visibility at all times. With the top down and the rear window up, you enjoy reduced wind buffeting and a quieter cabin. When the sun is uncomfortably strong, raise the softtop and lower all five windows for a pleasant open-air feeling; BMW engineers have dubbed this the "California" mode. With all windows closed, the softtop's three layers of fabric ensure a quiet and comfortable ride.

A fully automatic – and nearly silent – mechanism lowers the roof in 19 seconds and raises it in 24 seconds. But whether the softtop is up or down, you always enjoy the best of nature and BMW engineering, in luxurious comfort.

The shape of the fin roof allows for an upright, electrically heated glass rear window that can be raised and lowered independently of the softtop.

1.

A side profile view of a silver BMW 6 Series Convertible with the softtop down. The car is shown from the side, highlighting its sleek, elongated silhouette.

OPEN TO STYLE.

The top-down elegance, with its elongated silhouette, is visually striking. The power rear window is an innovative feature: it can be raised or lowered independently of the softtop, to minimize road noise and breeze when the softtop is down, and enhance ventilation when the softtop is up.

2.

A side profile view of a silver BMW 6 Series Convertible with the softtop up. The trunk is open, showing the storage compartment for the softtop.

SPACE-SAVING STORAGE.

The softtop takes up very little space when stored in its compartment behind the two rear seats. Even with the top down, the trunk can accommodate two golf bags. When the top is up, the softtop's storage compartment can be compressed for even greater trunk space.

3.

A side profile view of a silver BMW 6 Series Convertible with the softtop up. The trunk is open, showing the storage compartment for the softtop.

AUTOMATICALLY QUIETER.

Raising and lowering the softtop is a quick operation, silently and reliably executed by one hydraulic pump, two electric motors and six hydraulic cylinders working together in harmony.

4.

THREE LAYERS OF SILENCE.

The softtop consists of three layers of fabric. Between the weatherproof outer layer and the luxurious headliner, a foam layer dims noise to a pleasant, low level, while keeping conditioned air in. This design provides even better thermal insulation than the steel roof of a coupe.

5.

A side profile view of a silver BMW 6 Series Convertible with the softtop up. The trunk is open, showing the storage compartment for the softtop.

RAPID DEPLOYMENT.

It takes just 19 seconds to open the softtop and 24 seconds to close it. Both operations are possible at road speeds up to 25 mph.

6.

FLOWING ELEGANCE.

A unique fin roof ensures that the silhouette is nearly the same as that of a coupe. The design even preserves the characteristic BMW look of the side windows.

Dynamic character.

Your exciting first experience associated with the all-new 6 Series Convertible: selecting the exterior and interior colors and trim. Express your powerful passion by combining Black Sapphire Metallic paint and Black softtop with the fiery richness of Vermilion Red Nappa Leather upholstery.

The Aluminum interior trim boldly anchors the vibrant colors, generating a look that's both dynamic and sophisticated. The addition of massive 20-inch V Spoke (Style 356) light alloy wheels with low-profile performance tires¹ rounds out the confident stance.

Strong presence.

A composition of pure style starts with rich Mojave Metallic exterior paint, complemented by the warmth of supple Ivory White Nappa Leather and Fine Line Oak Wood interior trim. Add the supreme comfort of Active, ventilated, Multi-contour front seats to make every drive a pleasurable event.

The sleek exterior is enhanced by the gleam of 19-inch Star Spoke (Style 367) light alloy wheels. The all-new 6 Series Convertible attracts many admiring glances, whether the classic Beige softtop is up, creating a coupe-like silhouette, or neatly folded inside the trunk.

Standard/Optional equipment.

■ **Xenon Adaptive Headlights** optimize road illumination when entering a turn or corner, helping to enhance visibility when driving at night. Sensors continuously monitor the angle of the steering wheel to determine the direction in which your vehicle is heading. The outer headlights swivel accordingly, up to 15 degrees left or right.

Xenon low- and high-beam headlights illuminate the road ahead and to the side with brilliant clarity. An auto-leveling feature adjusts for varying passenger and cargo loads. **LED Corona headlight-surrounds** that frame the perimeter of both headlights and high beams also act separately as Daytime Running Lights and parking lights.

■ **Rhombus-shaped chrome-surround exhaust tips** are integrated into each side of the rear fascia of the 650i Convertible.

■ **Side turn-signal indicator lights**, integrated in the side gills, use LED technology and add individual style.

■ **BMW signature front kidney-shaped grille** is redesigned with angled vertical slats in the all-new 6 Series Convertible. Highlighted by a chrome surround, the fronts of the slats are finished in chrome; the sides are finished in matte black.

■ **Taillight cluster** with taillight, brakelight and turn-signal indicators incorporate LED technology for greater visibility.

■ **Adaptive Brakelights** warn following vehicles by increasing in brightness when the intensity of your braking action is increased.

■ **Star Spoke (Style 367)** 19 x 8.5 light alloy wheels with 245/40 **run-flat¹ all-season tires.**

□ **V Spoke (Style 356)** 20 x 8.5 front, 20 x 9.0 rear light alloy wheels with 245/35 front and 275/30 rear **run-flat¹ performance tires.²**

Please note: Driving over rough or damaged road surfaces, as well as debris, curbs and other obstacles, can cause serious damage to wheels, tires and suspension parts. This is more likely to occur with low-profile tires, which provide less cushioning between the wheel and the road. Be careful to avoid road hazards and reduce your speed, especially if your vehicle is equipped with low-profile tires.

For details on the availability of standard and optional features, please refer to the **Equipment charts** in the following section of this brochure.

¹ Run-flat tires do not come equipped with a spare tire and wheel.

² Performance tires not recommended for driving in ice and snow conditions.

³ Check for a list of tested mobile phones at your authorized BMW center or bmwusa.com/bluetooth.

■ Standard □ Optional or included in optional package

■ **Three-spoke leather-wrapped multi-function sport steering wheel**, featuring power tilt/telescoping adjustments, lets you keep both hands on the steering wheel while adjusting the audio as well as your BMW-tested, Bluetooth[®] enabled mobile phone.³ The left-hand buttons operate all Cruise Control functions, while those on the right control audio functions, such as the radio and your mobile phone and Voice command.

■ **Driving Dynamics Control** allows the driver to adjust the 650i Convertible's driving characteristics by pressing a button and selecting one of four settings. Choosing COMFORT, NORMAL, SPORT or SPORT+ mode adjusts the engine-throttle response, transmission shift characteristics and power-steering assist. An additional button allows the traction control feature to be disengaged when driving on sand, gravel, or deep or packed snow.

■ **Instrument cluster** displays speedometer, tachometer, fuel gauge and engine oil temperature. Below the four dials is a high-resolution Info Display that shows data such as current fuel consumption, range, on-board computer functions, mileage and trip information. **Black Panel Display** technology shows the instrument cluster as a matte black surface when the ignition is switched off, with only the chrome rings of the circular instruments visible in 3-D. When the ignition is switched on, the chrome rings turn into full circles, and the dials and displays appear. Turning on the ignition also activates the Check Control messages.

■ **Ambiance lighting** adds the drama of a warm reddish light that runs from front to rear beneath the inner door ledge. Ambiance lighting also includes a soft on/off automatic interior light system; reading lights above the rear-view mirror; vanity mirror lighting; illumination in the front footwells, trunk, and storage compartments in the center console and doors; and illuminated door trims and entry sills with metal inserts. Exterior vicinity lighting is integrated into the exterior door handles – lights radiate downward for approximately 20 seconds when doors are unlocked, allowing safe vehicle access in the dark.

□ **8-speed Sport Automatic transmission** with Adaptive Transmission Control (ATC) provides extremely fast synchronized shifting in either the Sport or Manual shift mode. Includes racing-inspired steering wheel-mounted paddle shifters.

□ **Heated steering wheel** is a feature that, like heated seats, becomes a "must-have" once it's experienced. The heating switch is conveniently located on the multi-function steering wheel.

Standard/Optional equipment.

❑ **Ceramic controls** present a deep black glazed finish to various controls, such as the iDrive Controller bezel, front and rear ventilation controls, and audio controls. The black ceramic provides a rich, custom look and unusually unique feel to the interior.

❑ **Black Nappa Leather with contrast stitching** covers the 6 Series Convertible's instrument panel, upper door, side trims and center console, extending the rich look and feel of the interior. The contrast stitching matches the Nappa Leather seat upholstery color; Black Nappa Leather seats come with Gray contrast stitching.

■ **Control Display** shows the functions supported by the iDrive Controller, vehicle settings and radio, as well as the Navigation system. The free-standing, high-resolution flatscreen 10.2-inch color monitor is glare-free, and positioned at an ideal viewing height and distance.

■ **Navigation system** uses GPS satellites in conjunction with data stored on a 12 GB internal hard drive. Includes 3-D daytime and nighttime maps, zoom, travel planner and an Assistance Window. The system provides Real Time Traffic Information on potential traffic problems and solutions.

❑ **Lane Departure Warning feature¹** uses a camera to recognize when your vehicle is crossing over roadway lane markings or is changing lanes without signaling, and warns you by sending a mild vibration through the steering wheel. The system can be turned on and off via a button by the steering wheel.

❑ **Active Blind Spot Detection** warns you if a vehicle is in your blind spot, or if a vehicle is approaching at high speed in the passing lane, by displaying a visual signal in the exterior mirror casing. The system also warns you by making the steering wheel vibrate should you then use the turn-signal indicator before executing a lane change.

❑ **Side-view Cameras** positioned in the front bumpers show, on the Control Display, video images of traffic approaching the front of the vehicle from the sides, such as when exiting a garage or parking space. The **Top-view Camera** provides video images of the road alongside the doors, taken by cameras positioned in the exterior mirrors.

■ **Rear-view Camera** shows, on the Control Display, the area behind your vehicle. Working with Park Distance Control, interactive guidelines indicate if a parking space can accommodate your vehicle, and display parking trajectories and turn angles. Located behind the BMW badge on the trunk lid, the feature is activated by engaging either the reverse gear or the iDrive system.

■ **Park Distance Control (PDC)** uses sensors located in the front and rear bumpers to facilitate parking and steering in tight spaces. During parking maneuvers, a warning beep sounds faster as your bumper approaches an object, turning into a constant tone when the distance is less than 12 inches away. It is also shown in the Control Display, indicating the distance to stationary objects.

❑ **BMW Night Vision with Pedestrian Detection** can scan up to 900 feet ahead using an infrared camera in the front bumper.² It can detect people and animals, as well as the direction of their movement, up to approximately 300 feet away, and displays their presence on the iDrive screen and Head-up Display (if so equipped). The system gives a visual warning as soon as pedestrians or animals move toward the road, alerting you to potential dangers significantly earlier, so you can react more quickly.

❑ **Head-up Display** projects important travel information, such as vehicle speed and Check Control warnings, onto the windshield directly in your field of vision. For the first time, all Head-up Display data is shown in full color, making information even more precise and easier to process. Additional information including Navigation directional arrows and instructions, Lane Departure Warning messages and warnings from the BMW Night Vision with Pedestrian Detection system can also be displayed.

❑ **Contrast stitching** is included with the extended Black Nappa Leather instrument panel, door and side trims, and center console. Two distinctively stitched flat-felled seams of the same color as the Nappa Leather upholstery add a custom effect to the instrument panel to embellish the 650i Convertible's interior. Contrast stitching for Black Nappa Leather upholstery is Gray. (See page 41 for visual details.)

For details on the availability of standard and optional features, please refer to the **Equipment charts** in the following section of this brochure.

¹ Requires clearly definable lane markings that are not obscured by rain, snow, etc. The feature is not a substitute for the driver's own responsibility in maintaining safe control of the vehicle.

² Under optimal road conditions. Night Vision performance is also limited by rain, fog, humidity and other weather conditions.

Standard/Optional equipment.

❑ **Parking Assistant** makes parking a breeze by searching for suitable parking spots and then steering your vehicle into them. Simply press the "Park Assistant" button, then drive along potential parking spaces on the left or right side of the road, staying below 22 mph and no more than five feet away. Using ultrasonic sensors integrated into the side indicators, the system searches for and measures parking spaces. When a space at least four feet longer than your vehicle is spotted, it is shown on your Control Display. Shift into reverse and Parking Assistant takes control of steering your vehicle into the selected space; you operate the accelerator and brake pedals. The acoustic and visual warnings of Park Distance Control (PDC) provide assistance.

■ **BMW Assist™** and Bluetooth® system offers hands-free calling through your BMW-tested Bluetooth phone. The BMW Assist Safety Plan is included for four years, providing Automatic Collision Notification, Emergency Request, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery, TeleService and more. The optional Convenience Plan offers Directions, Traffic, Weather, Critical Calling and Concierge services, as well as BMW Online, which allows access to current fuel prices, weather forecasts, Bloomberg's stock indices and the powerful reach of the Google Maps™ database. (See page 60 for details on standard and optional services available with BMW Assist.)

■ **Mobile Office** integrates with your on-board Navigation system and Bluetooth mobile phone. Call your appointment by using the iDrive Controller to click on a phone number on your Calendar or To-do List. Transfer text messages and emails to your iDrive Display screen and listen to them read aloud via the audio system. Conduct conference calls – the Display screen keeps you informed of the status of incoming calls. If you've uploaded photos to your on-board phonebook, it even shows who is on the line.

For details on the availability of standard and optional features, please refer to the **Equipment charts** in the following section of this brochure.

■ **Integrated Owner's Manual** provides immediate access to all vehicle-specific information. This digital version of the traditional printed manual that is included with your BMW can be accessed via the iDrive and is shown on the Control Display. The system's user-friendly features includes multi-media elements such as animations and dynamic illustrations.

■ **BMW anti-theft AM/FM stereo CD/MP3 audio system** offers Radio Data System (RDS), Auto-Store, and 3-channel FM diversity antenna system. Includes a 9-speaker, multi-channel hi-fidelity sound system incorporating a digital amplifier with 205-watt output power and vehicle-specific equalizing. The system includes 2 tweeters and 2 midrange speakers in the front door trims, 2 midrange speakers in the rear side trims, 1 midrange speaker in the center of the instrument panel and 2 bass speakers underneath the front seats.

■ **Hard disc drive**, included as part of the Navigation system, provides 12 GB of storage space. Store and quickly access media files or up to 2,000 songs, transferred from a CD, MP3 player or USB stick.

❑ **iPod®** and **USB adapter** supplies connection capabilities for a USB stick as well as other compatible audio sources, and also includes the ability to display album covers from suitable USB devices.

❑ **Sirius Satellite Radio** delivers over 130 channels of the most innovative satellite radio music, news, sports, talk, comedy and entertainment. All music channels are commercial-free – and it's delivered coast-to-coast in crystal-clear digital sound, 24 hours a day. Add "The Best of XM" to enjoy additional premium programs, like Oprah Radio®, XM Public Radio®, The Virus® and top-notch sports action, plus 10 channels of XM Play-by-Play sports. If your BMW is equipped with iDrive, you can also select Sirius XM channels through your vehicle's iDrive system or Voice command, and enter them into the programmable memory buttons.

❑ **Premium anti-theft AM/FM stereo CD/MP3 audio system** with Radio Data System (RDS), Auto-Store, and 3-channel FM diversity antenna. Includes 12 speakers with DIRAC signal processing and Surround mode, discrete 5.1 multi-channel sound, 7-band equalizer incorporating an analog amplifier with 500-watt output power and vehicle-specific equalizing. The system includes 5 tweeters, 5 midrange speakers and 2 bass speakers.

■ **2-zone automatic climate control** allows driver and front passenger to select individual temperatures and choice of fan speeds, as well as choose automatic or manual airflow and recirculation. The automatic recirculation control activates whenever certain air pollutants are detected. The system also offers a mist-up sensor, solar sensor and residual heat use.

Standard/Optional equipment.

■ **20-way power Multi-contour front seats** conform to your body to provide optimum support and exceptional comfort over long distances. In addition to horizontal, vertical and angled adjustments, Multi-contour seats include an articulated upper backrest, comfort headrest (two-way power, two-way manual “relax headrest”), and four-way power-adjustable lumbar support. Both driver’s and front-passenger’s seats include memory function.

□ **Active front seats** (not shown) imperceptibly raise and lower the left and right halves of the seating surface. This movement keeps the spine in motion, exercising various support muscles to help reduce fatigue on longer trips.

□ **Ventilated front seats** (not shown) gently blow warm or cool air through the micro-perforations in the leather to keep driver and front passenger comfortably dry in hot weather, and warm in colder weather.

■ **Integrated safety-belt system** provides optimal protection and ergonomic comfort for the driver and front-seat passenger. The seat-integrated design also helps make entering and exiting the rear cabin easier.

□ **Heated front seats** are a welcome feature for driver and front passenger in cooler weather. By pressing the icon button, seat surface and backrest are heated and quickly radiate comfortable warmth in your choice of settings.

■ **Front armrest** with integrated storage compartment opens up to allow access to the optional iPod® and USB adapter, and Smartphone Integration adapter.

■ **Rear seating** consists of two individual seats covered with supple Nappa Leather. Both include an ergonomic belt system with integrated belt catches, two three-point safety belts and headrests. A LATCH child-seat fastening system is also included.

■ **Heated glass rear window** in the 650i Convertible can be raised independently of the softtop to reduce air turbulence and create a quieter cabin when driving at higher speeds. When driving in slower traffic, or when the softtop is raised, the window can also be lowered out of sight.

■ **Convertible softtop**, with its streamlined aerodynamic shape, is triple-lined and fully automatic. A middle lining helps reduce wind noise and enhances insulation. To complement your selection of exterior paint color, the softtop is available in either Black or Beige.

■ **Fully automatic softtop** can be raised or lowered at speeds of up to 25 mph by simply pressing a button at the front of the center console. The top automatically unlatches from the header and folds down neatly. The heated glass rear window can be raised or lowered independently of the softtop. The softtop can also be raised or lowered conveniently via a remote control feature of the Comfort Access keyless entry fob.

■ **Variable softtop compartment** can be opened and closed effortlessly with one hand, using the collapsible handle. Thanks to its special folding mechanism, the box folds away flat, using a minimum of trunk space. When pulled out, it provides storage space for the softtop when it’s in the down position.

Standard/Optional equipment.

■ **Door entry sills** include metal inserts finished in high-gloss chrome with a fine-brushed aluminum surround for durability. When the doors are opened, the BMW logo and adjacent strips in each door sill illuminate – a practical and elegant design feature.

□ **Ski bag** accommodates up to two pairs of skis or other long objects for practical transport inside the vehicle even when rear seats are occupied. The bag protects transported items as well as the vehicle interior from damage, and can be tucked away out of sight in the backrest when not in use.

■ **Comfort entry** to the rear seats is facilitated by enabling the seatbacks to be released easily with one hand to move the seat back and seat base forward.

■ **Luggage compartment** (shown with the softtop compartment raised) is designed for easy access. Offering more than 12 cubic feet of luggage space, it fits two golf bags. The power trunk lid can be opened automatically via the Comfort Access remote control.

We believe that a premium ownership experience should feature performance and luxury, as well as safety and convenience. We believe you should be able to drive a BMW to its potential, while enjoying peace of mind and reduced cost of ownership. That's the idea behind **BMW Ultimate Service**[®]: a suite of comprehensive programs and services that are included in every new BMW vehicle.

GOING BEYOND ENGINEERING: THE HIGH-PERFORMANCE BMW OWNERSHIP EXPERIENCE.

BMW Maintenance Program is one of the most comprehensive maintenance programs in its class. We cover all factory-recommended maintenance during the New Vehicle/ SAV Limited Warranty coverage period. This includes scheduled oil services and inspections. Also covered is the replacement of items that are subject to normal wear and tear, such as brake pads, wiper blade inserts and engine drive belts.² And, thanks to BMW's advanced engineering, most owners enjoy a well-balanced maintenance schedule, with flexible routine service intervals that can save you time. When your vehicle requires attention, your authorized BMW center ensures that it receives only genuine BMW parts – your assurance of exacting quality standards.

For more details on BMW Ultimate Service and the BMW Maintenance Program, visit your authorized BMW center or log on to bmwusa.com/ultimateservice.

BMW Assist Safety Plan³ is a four-year program that lets you enjoy peace of mind knowing that a friendly response specialist is there to help you, 24/7, at just the push of a button. The Safety Plan includes Automatic Collision Notification, Emergency Request, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery and Customer Relations. Included in the BMW Assist Safety Plan, MyInfo allows you to send business locations and street addresses with their associated phone numbers from the Google Maps™ website directly to your BMW. The destination can be sent to your Navigation system for turn-by-turn directions. With the BMW Navigation system and your mobile phone linked to your BMW via Bluetooth® technology, BMW's Mobile Office feature transfers text messages and emails to your iDrive Display screen and reads them aloud to you. A Calendar and To-do List can also appear on your Display screen while en route. Running late? Click on the phone number in the Calendar to call your appointment. For a list of tested mobile phones, visit bmwusa.com/bluetooth.

BMW Ultimate Service starts with the **New Vehicle/SAV Limited Warranty¹**, providing you with coverage for the first four years or 50,000 miles, whichever comes first. Additionally, you have 12-year, unlimited-mileage warranty protection against corrosion and rust perforation.¹ The **BMW Maintenance Program²** and **BMW AssistTM**,³ as well as **BMW Roadside Assistance** come standard.

For the ultimate in coverage, add the optional **BMW Assist Convenience Plan⁴**. You'll enjoy unlimited access to personalized Directions, Traffic and Weather reports, as well as our Concierge feature, which can send a destination address and phone number, such as a restaurant or hotel, right to your BMW. You can make up to four operator-assisted calls per year with Critical Calling if your cell phone is not available, or if its battery is discharged. BMW Online allows access to up-to-date fuel prices and the latest weather forecasts, as well as Bloomberg's stock indices and the powerful reach of the Google Maps database – delivered to the iDrive Display right inside your vehicle.

BMW's unique **TeleService**, included in the BMW Assist Safety Plan, continually monitors specific parts that are subject to wear and tear – including the engine oil, micro-filter, spark plugs, brake linings and various fluids – as well as services that require attention at regular intervals, such as vehicle service inspections. This data is automatically transmitted to your authorized BMW center, which

will then call you to schedule a service appointment. You don't have to keep track of when your vehicle requires routine maintenance. An added benefit: any needed maintenance service parts will already be on hand, so your BMW is serviced and returned to you as quickly as possible. And because they use only Original BMW Parts, you can rely on expert fit and long-lasting BMW quality. For more details on TeleService, visit bmwassist.com.

BMW love stories. There are people all over the world who have two things in common: a very special relationship to BMW vehicles, and a zest for life. One of them is Murray Fowler (photo), born in 1929, from Costa Mesa,

California. His best friend has four wheels and boasts 413,575 miles on the odometer. It's a BMW 2800 CS, also known as Blue Max. "This car has a soul," Murray says. A film team has visited people like Murray Fowler all over the globe. The result is a collection of unique miniature portraits: authentic, original and full of joy. BMW UNSCRIPTED is the name of this fascinating internet film series, exclusively available on BMW TV.

BMW and the environment.

BMW is a strong proponent of the environment and social responsibility. We launched BMW EfficientDynamics back in 2000 – the philosophy of providing greater power with increased efficiency and fewer emissions. This has resulted in significant benefits today – for our customers, the climate and the environment.

That year, ecological sustainability was also declared one of BMW's core strategic principles; it is now firmly anchored in our entire production chain. It starts with the development of fuel-saving and alternative vehicle concepts, continues with environmentally friendly production processes, and ends with innovative recycling methods. This effort has been recognized worldwide; in 1999, BMW AG – the parent company of BMW of North America and BMW Manufacturing Co. in Spartanburg, SC – was the first automotive company to be represented on the Dow Jones Sustainability Group Index. It has remained on the Index ever since; moreover, for the last six years, BMW has been voted the world's most sustainable automobile manufacturer. At BMW, we strive for and achieve high performance in all we do.
