A 414-hp, high-rev V-8 engine. A degree of agility never before experienced. And dynamic handling that can't be described but only felt. The fourth-generation BMW M3 – in Sedan, Coupe and Convertible form – is a legend in the making. Discover for yourself how the exceptional M3 is as impressive on the road as it is on the racetrack. And experience the exhilaration that is BMW M.

Visit [bmwusa.com/M](http://bmwusa.com/M) to explore BMW M.

## Raising the pulse of racedrivers: The BMW M3 Coupe.

Dubai Autodrome, 100 degrees in the shade. The M3 Coupe is already in pole position. Since its inception, the BMW M3 has embodied the very soul of motorsport. Now it's setting a new benchmark on the world's racetracks. Virtually all components have been constructed from the ground up with one goal: to exceed the capabilities of its illustrious predecessor. A muscular, racing-inspired 4.0-liter V-8 engine is a driving enthusiast's dream. The M3's intelligent lightweight construction contributes to its dynamic responsiveness and sporty road feel. The look is designed to set your pulse racing. Get behind the wheel and experience the thrill of purebred sports car performance.

## Music to your ears at 8400 beats per minute.

One of the V-8's many motorsport-inspired advances: using eight separate throttle butterflies, one for each cylinder, to deliver faster engine response and greater overall performance and efficiency. Another is BMW's variable Double-VANOS technology, which precisely adjusts valve timing all the way up to the M3's staggering 8400-rpm redline. It's engineering like this that contributes to the M3 Coupe's 0-60 time of an incredible 4.5 seconds.<sup>1</sup> Trust BMW M to turn the tarmac into your paved playground.

<sup>1</sup>BMW AC test results with M Double Clutch Transmission. BMW urges you to obey all posted speed laws and always wear safety belts.

Along with faster 0-60 times, reducing a vehicle's weight also helps deliver lightning-quick responsiveness and uncanny driving dynamics. BMW's intelligent lightweight engineering gives the latest generation M3 an enviable weight-to-power ratio of 8.9 lbs/hp. The M3's suspension, for example, uses weight-optimized components, like an aluminum front axle. The M3 Coupe's carbon-fiber roof weighs 11 lbs. less than a steel roof, and 45 lbs. less than a steel moonroof. By reducing the weight of the roof, BMW lowers the center of gravity, thus minimizing body roll and enhancing grip through turns.

To achieve the M3's superior handling,  
our engineers had to lighten up.

A rear view of a white BMW M3 driving on a racetrack. The car is positioned on the left side of the frame, moving away from the viewer. The license plate reads 'M CY 4547'. The background shows a blurred racetrack with red and white barriers, suggesting high speed. The sky is overcast.

A shift in the  
ultimate driving paradigm.

As signified by its V-8 engine, the BMW M3 raises the bar for high-performance vehicles in virtually every respect. The standard M3 transmission is a smooth 6-speed manual, with a heavy-duty clutch for immediate pickup at the starting line and during shifting. Piloting the M3 through gear after gear all the way up to the 8400-rpm redline is the perfect way to take advantage of all 414 horses. And when it comes to stopping power, the M3 is no less impressive. Massive 14" cross-drilled compound brakes work in conjunction with Dynamic Brake Control and a special high-performance-tuned anti-lock braking system for reliable, responsive vehicle control in virtually any conditions. In the racing-inspired world of the M3, there is no room for anything less.

## Fast looks that stop you in your tracks.

You can tell at a glance that the power of a high-performance athlete lurks within the BMW M3 Coupe. Even standing still, its muscular proportions make it look poised to take the checkered flag. The wheel-well extensions accommodate its wider stance; the flat underfloor and rear spoiler lip improve its aerodynamic efficiency. In the front hood, a bold powerdome barely contains the potent V-8 powerplant that lies below, its craving for oxygen fed by intelligently placed air intakes in the front, sides and hood. Signature dual chrome-plated twin exhaust tips, as well as the M vents in the front side panels, brand the M3 as a fierce competitor and its blistering performance upholds the claim.

On every road,  
you're on the fast track  
to driving pleasure.

From the racetrack to the open road, the BMW M3 Coupe never fails to amaze. It combines the dynamics and agility of a sports car with everyday practicality and comfort. Thanks to the finely tuned lightweight chassis with Electronic Damping Control, you can set damper settings to one of three levels – Comfort, Normal or Sport. The Dynamic Stability Control's suspension control system gives valuable aid to the driver, as does the Variable M Differential Lock, which delivers enhanced stability and increases grip. You enjoy improved start-up and acceleration, even under challenging conditions.

Step inside and  
prepare for takeoff.

You'll find the M3 interior sleek, athletic and totally energizing. Just the sight of the signature M trim and logo on the door sills can raise any driver's pulse. And like the cockpit of any track-worthy vehicle, you're in total control. Grip the thick, leather-wrapped rim of the compact multi-function M Sport steering wheel. It's designed to help you handle demanding high-performance maneuvers. From there it's easy to access the M Drive system. Modify your vehicle setup through buttons located on the center console, next to the shift lever. Eye-catching back-lit instrument dials with glowing red tach hands provide vital driving information at a glance. Check the oil temperature gauge, as well as the tach that displays maximum available revs, which increase as the engine warms up.

The M3 cabin is finished in luxurious materials of the highest quality, such as Novillo Leather upholstery finished in a choice of Black, Silver, Bamboo Beige or Fox Red. Handsome trim accents are set off by the dark Anthracite lining the roof and the top half of the instrument panel.

Body-hugging, fully adjustable M Sport seats offer adjustable backrest widths for improved support in the sharpest turns. The road beckons, so strap yourself in. It's time to drive.

You're tempted to break the law.  
Of physics.

A blinding flash of  
precision M engineering:  
the BMW M3 Sedan.

Adhering to a time-honored M engineering principle, the M3 Sedan's form follows its high-performance function. And the challenging curves of the Circuit de Catalunya near Barcelona provide the perfect proving ground. A discreet spoiler lip on the trunklid reduces lift on the rear axle, helping the M3 maintain high-speed stability. The flat underfloor and specially designed mirrors further boost its aerodynamic efficiency. And gleaming alloy wheels – 18" M-style Satin Chrome finish or 19" polished and forged M Double Spoke – help keep brakes cool during performance driving maneuvers, while reducing unsprung weight for better traction and ride comfort.

Unparalleled levels of control.  
Unprecedented thrills on the road.

The M3 offers customizable control that goes right to the heart of the driver's desires. The M Drive feature provides a comprehensive array of choices when it comes to personalizing your M3's driving feel. Dynamic Stability Control (DSC) helps to deliver optimal traction; but with M Drive, DSC can also be set to a track-oriented M Dynamic Mode (MDM), which allows for more wheelslip and yaw angle. Engine response can be tweaked via a button in the center console, which calls up Normal, Sport or Sport Plus programs. The M3 is a formidable performer that will obey your every driving command – with immediate and gratifying results.

We've gone to  
great lengths to take you  
where you want to go.

Honed by our M engineers to perform like no other vehicle. Tested through more than 600,000 miles of corners and straightaways at the Nürburgring's infamous Nordschleife. With astounding technical prowess, the M3 powerfully upholds its M heritage. The rigid lightweight chassis and uniquely engineered front and rear axles form the foundation of the M3's driving dynamics. The short-ratio final drive features a Variable M Differential Lock for up to 100% locking action, for optimal traction at all times. Standard M Servotronic variable-assist power steering is speed-sensitive, automatically adjusting to enhance road feel at any velocity. These are features more commonly associated with high-performance racing vehicles. But to a true M enthusiast, it's just the kind of engineering that helps you get where you're going: driving nirvana.

Even its stopping power  
can leave you breathless.

M3 brakes are a breed apart; even the biggest stresses and strains leave these perforated compound brake discs unfazed. Their floating design means they are fade-resistant, even at high temperatures. Perforating the brake discs doesn't just save weight – it also helps deliver powerful brake performance, even in wet driving conditions. What's even more crucial, the M3's high-performance brakes offer outstanding stopping capabilities when driving at high speeds. On the track, they let you take advantage of the ideal brake point in curves. And on the road, they give you an "active safety" edge in avoiding accidents.

It's no coincidence that the M3 Sedan looks fast; its distinctive features are designed for peak performance. 18" M-style light alloy wheels and polished dual twin tailpipes further contribute to its daunting appearance. Add exclusive M Metallic paint color options and it becomes vibrantly clear: the M3 Sedan is a formidable champion to all who dare challenge it.

Born for the fast lane.

The fourth-generation M3 Sedan is a triumph of everything BMW stands for. It's an M Car capable of competition-devouring performance. It's also a classic BMW sports sedan, offering convenience, four-door versatility and a spacious trunk. The M3's sophisticated lines are equally at home on the town and at the track. Yet its race-bred soul will transport your love of driving farther and faster than you ever dreamed possible.

Designed for those  
whose everyday life  
is a sporting event.

## BMW M-style launch pad.

In addition to its awe-inspiring capabilities on the road, the M3 also ensures you and your passengers are treated to the best in luxury and convenience. BMW offers a wide range of options that will deepen your audio enjoyment, starting with the Enhanced Premium audio system, complete with 16 speakers and a high-end amplifier. You can also enjoy the pleasures of HD Radio™ and SIRIUS Satellite Radio, both of which offer more listening choices, all with amazingly clear audio quality. Or, hook up your iPod® to the iPod and USB adaptor for quick access to songs and playlists, selected by using the steering-wheel buttons. And when it comes to driving with peace of mind, the M3 has you covered – with extensive active and passive safety features, plus the protection of BMW Assist.™<sup>1</sup> It's a staggering level of comfort and everyday convenience for a high-performance vehicle.

Back seats  
that refuse  
to take a back seat  
to anyone.

The M3 Sedan is spacious enough to seat five adults; the M3 Coupe easily accommodates four, with a storage box between the two rear seats. All rear-cabin passengers can appreciate the M3's luxurious ambiance: every seat is ergonomically designed for supple support and ample legroom, so even long trips are a joy. And the real passenger treat comes when the V-8 engine flexes its 414-hp muscles, pushing everyone back into their comfortably cushioned seats.

The M3 Convertible:  
Open to life on the edge.

## The hottest performer under the sun.

Up ahead: the legendary city circuit in sun-drenched Monaco. Under your control: the M3 Convertible, the key to both high-performance excitement and open-air exhilaration. The M3 Convertible turns the roadway into a runway, thanks to BMW's muscular 414-hp V-8 engine. This racing-inspired powerplant, combined with the new 7-speed M Double Clutch Transmission (M DCT) with Drivelogic, is a driving enthusiast's dream. From the lightweight aluminum suspension that improves handling, to M Drive that allows you to set performance parameters, to the retractable hardtop, virtually all of the M3 Convertible's components are designed with one goal: a stimulating driving experience on the highest performance level.

**The Monaco Grand Prix was first held in 1929. The 2.07-mile-long circuit has been part of the Formula One World Championship since 1955. Due to the unique terrain and the often difficult racing conditions, this circuit is considered the ultimate test in the entire championship schedule.**

## Handling that can be adapted to fit every mood.

Get behind the wheel of the M3 Convertible, and you open up a new world of inspired and exhilarating driving possibilities at every turn. That's why BMW offers M Drive to provide a comprehensive array of choices when it comes to personalizing your M3 Convertible's driving feel. Normally, Dynamic Stability Control (DSC) helps to deliver optimal traction; but with M Drive, DSC can also be set to track-oriented M Dynamic Mode (MDM), which allows for more wheelslip and yaw angle. Electronic Damping Control (EDC) can be set to Comfort, Normal or Sport, depending on your preferred handling settings and the surface of the road. Engine response can be tweaked via a button in the center console, which calls up Normal, Sport or Sport Plus programs. But however you configure it, the M3 Convertible brings together unmatched levels of responsiveness and control as only BMW M can deliver.

For details on the availability of standard and optional features, please refer to the Standard equipment | Optional equipment charts at the back of this brochure.

Warning: Tight corners can become  
habit-forming.

Even when careening around corners at a pulse-quicken pace, the M3 Convertible's precise control lets you stay calm and collected. The large cross-drilled compound brakes work in conjunction with a special high-performance-tuned anti-lock braking system for reliable, responsive vehicle control in virtually any conditions. The M3 also delivers incredible grip, thanks to a short-ratio final drive that features a Variable M Differential Lock, for up to 100% locking action. Inspired and intelligent technologies go into every one of our high-performance vehicles – that's how we stay ahead of the curve.

## Mastering any road with breathtaking agility: the brilliant M suspension.

Straightaways can become hairpin turns in the blink of an eye. But the M3's suspension design handles whatever the road throws at it with finesse. At the heart of the M3's responsiveness is a front axle made primarily of aluminum; an additional thrust plate across the entire frame adds stability, making the front axle not only lightweight, but extremely rigid. The five-arm rear suspension features all-aluminum track control arms and dampers; compared to construction using more conventional material, it's stiffer and 5.5 lbs. lighter. Anti-roll bars, front and rear, and two additional longitudinal bars contribute to the M3's powerful, sporty dynamics and road feel. The M3's agile suspension frees the rest of its innovative, performance-enhancing features to operate to their most thrilling capacity.

One of the world's fastest mood elevators.

The M3 Convertible delivers the ideal driving experience all year round. When you want the exhilaration of the open air, simply press a button, and its power-retractable steel roof stacks and stows in just 22 seconds. Come the first sign of rain, another press of a button and the M3's top raises in 23 seconds, quickly turning fair-weather fun into all-weather functionality. When it's up, the roof gives the M3 a sleek, sporty look that's quintessentially BMW, right down to the signature Hofmeister kink. All of which makes the M3 Convertible a powerful way to re-energize your senses – especially, your sense of adventure.

The M3's retractable roof is far more than just a steel version of a softtop. When raised, the full roofliner effectively insulates the interior against cold and exterior noise. At the push of a button on the center console, a motor electrohydraulically begins the process of lowering the top. First, the roof is separated into three sections, which then smoothly move towards the rear and stack one above the other. At the same time, the trunklid unlocks at the front and swings up. The stacked roof sections are lowered into a special storage compartment; the trunklid closes. Total time from top-up to top-down: 22 seconds. The trunk can now be opened from the back, and gently closed using the soft-close feature.

The roof can also be raised and lowered by using the keyfob buttons when the M3 Convertible is equipped with Comfort Access. This option also includes the Comfort Opening and Loading feature: to stow large packages in the trunk when the top is down, a touch of the remote button raises the stacked roof up and conveniently out of the way, letting you access more trunk space; another press lowers it back down. All of which makes the M3 Convertible hardtop not just one of the sleekest, most beautiful convertible hardtops on the road today, but the smartest, as well.

For details on the availability of standard and optional features, please refer to the Standard equipment | Optional equipment charts at the back of this brochure.

Even with the top down,  
there's nothing "casual"  
about it.

Adhering to a time-honored M tradition, the M3 Convertible's form follows its high-performance function. It's no coincidence that the M3 looks fast – its distinctive features are designed for peak performance. Intelligently placed air intakes in the front, sides and hood allow proper ventilation for the V-8 engine. Wheel-well extensions accommodate its wider stance; the flat underfloor provides improved aerodynamic efficiency as the M3's speed increases. 18" M-style Double Spoke light alloy wheels and polished quad tailpipes also contribute to its daunting appearance. And with the top down, the M3's dynamic silhouette perfectly embodies the look of unparalleled driving joy.

Shown: Double Spoke (Style 220M) 19" polished and forged M light alloy wheels.

If you're going for driving pleasure,  
go all the way.

The M3 Convertible interior is sleek, athletic and totally energizing. At night, the driver-oriented cockpit is bathed in the glow of back-lit instrument dials, their illuminated red needles providing vital driving information at a glance. Strap yourself into the body-hugging M sport seats with adjustable backrest width, upholstered in handcrafted Novillo Leather. Thanks to Sun-Reflective Technology upholstery, the seats remain cooler even when parked in the sun with the top down. A selection of trims – Titanium Shadow, or Blue-gray Brushed Aluminum, Sycamore Anthracite Wood, or Carbon Leather – lets you further customize the interior. Treat your ears to the sound of one of the world's most exhilarating exhausts, or enjoy your favorite soundtrack via the Enhanced Premium Sound audio system. You can also add SIRIUS Satellite Radio, or simply hook up your iPod® to the iPod and USB adaptor and pick your playlist from buttons on the steering wheel. The M3 Convertible offers a truly sumptuous level of luxury, comfort and convenience for a high-performance vehicle.

## The high art of high revs.

Speed. Power. Control. Three things on the mind of every BMW M engineer. In designing the M3's engine, no corners were cut, and no boundaries were set. The results are an M3 first: a powerful 4.0-liter V-8 engine, with a dynamic 414-hp output and 295 lb-ft of available torque, as well as a maximum engine speed of 8400 rpm. It's the kind of muscle that will catapult the M3 Convertible from 0-60 in just 5.1 exhilarating seconds.<sup>1</sup> To accommodate the naturally aspirated engine, the M3 hood features a contoured powerdome and dual air intakes.

Thanks to the M3 engine block's special aluminum/silicon-alloy construction, the cylinder surface is created by the exposed hard silicon crystals in the alloy. This eliminates the need for conventional coated cylinder bores. For increased structural stability, the M3 V-8's crankcase is milled as a complete forging.

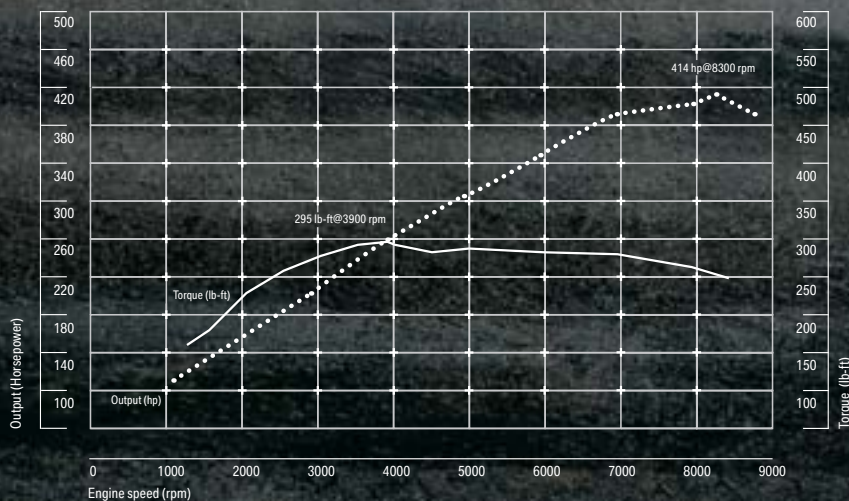

To achieve smooth power distribution throughout the rpm range, the M3's engine is tuned to truly track-worthy specifications. BMW's Double-VANOS technology ensures pinpoint-accurate valve timing, which allows for optimal combustion at every rev range, while lowering emissions.

In keeping with the M3's racing-inspired engineering, eight separate throttle butterflies operate precisely and independently, delivering amazingly quick throttle response. In addition, the engine's oil supply is carefully regulated by an advanced wet sump system to ensure adequate lubrication under any conditions. The result: breathtaking acceleration out of the turns and onto the straightaways.

An equally innovative engine management system enhances performance. Ion flow technology monitors the V-8's combustion process via the spark plugs, helping to prevent knocking. How far can revolutionary BMW technology take you? Hit the M3's Start button and find out.

<sup>1</sup> BMW AG test results. BMW urges you to obey all posted speed laws and always wear safety belts.

The M3's 414-hp V-8 engine was named "Best 3.0- to 4.0-Liter Engine" in the 2008 International Engine of the Year Awards by a panel of the world's leading automotive journalists.

Eight individually adjustable single throttle butterflies allow for instantaneous engine response.

With optional M DCT – 7-speed M Double Clutch Transmission – the M3 Convertible shifts like a racecar, only faster.

## M DCT Drivelogic. A transmission that's on a completely different wavelength.

Introducing M DCT Drivelogic: a new transmission option worthy of the M3's breathtaking driving dynamics.

This 7-speed M Double Clutch Transmission (M DCT) with Drivelogic uses two transmission structures in one large housing. First, third, fifth and seventh gears are grouped in one structure; second, fourth and sixth gears are grouped in the other. When upshifting or downshifting, the system switches between the two structures, so that while one gear is being disengaged, the next is already in position. And M DCT Drivelogic can even tailor gear use to your own driving needs. Choose from 11 different programs: six in Sequential mode, and five in Automated mode. In either mode, you can access the whole spectrum of the M3's track-inspired shifting dynamics.

Even racing fans are impressed with the results: M DCT Drivelogic delivers lightning-fast shifts that rocket you to top gear in the blink of an

eye. In manual mode, change gears by using either the shift lever, or steering wheel-mounted paddle shifters. It shifts like a racecar – only faster. In Sequential mode, the shift times vary, but in the sportiest programs, seamless shifts take only milliseconds to complete. You even get a prompt to indicate the ideal moment to change gears. In Automated mode, the system performs shifts automatically, with action so smooth you'll barely feel them at all.

In addition to its superior performance on the road, the M DCT Drivelogic transmission offers a range of functions for even more convenience. The LowSpeed Assistant makes parking easier, while the Auto-P function activates the handbrake once the engine is turned off, and selects the gear with the highest traction when you restart your vehicle.

The steering wheel of the BMW Sauber F1 Team racecar. In addition to its thick handles and gear-changing paddles, this carbon-fiber wheel is the driver's information center. The large digital display at the top provides a constant stream of critical operating data. And the constellation of control knobs, buttons and dials puts total control of the racecar at the driver's fingertips.

## A drive this inspiring starts with a high-performance platform.

When is a “sporty” vehicle considered truly “high performance”? When every component works together seamlessly. That’s where the M3 shines. At the heart of the M3’s responsive handling lies a front axle made primarily of aluminum, including the central subframe, the spring struts, the swivel bearings, and an additional thrust plate across the entire frame for added stability. As a result, the front axle is not only lightweight, it’s extremely rigid.

Redesigned from the ground up – except for a single trailing link borrowed from the 3 Series platform – the five-arm rear axle features all-aluminum track control arms, as well as aluminum dampers. And when compared to construction using more conventional materials, the rear axle is stiffer and 5.5 lbs. lighter.

Optimized for weight and stability, anti-roll bars are featured in both the front and rear of the M3’s chassis. Once again, special engineering of the axle geometry (which features two additional longitudinal bars) contributes to the M3’s powerful, sporty dynamics and road feel.

Working in conjunction with the suspension, the M3’s final drive features a Variable M Differential Lock, which provides up to 100% locking action for optimal traction on any surface, in any conditions.

The suspension design allows the rest of the vehicle’s innovative, performance-enhancing features – from the heavy-duty manual transmission to the M3 Coupe’s carbon-fiber roof – to operate at their most thrilling capacity. It’s the solid foundation that plays a huge role in the M3’s unmatched driving dynamics.

## Higher performance starts with less weight, lower down.

The M3 benefits from intelligent lightweight construction – in its suspension, its perforated compound brake discs, aluminum hood, and even its composite front fenders. But just reducing weight isn't enough to optimize a vehicle's driving dynamics. That's why BMW reduced weight in areas where it would have a positive effect on driving characteristics. M-style agility is achieved by concentrating the vehicle's weight as close as possible to its center of gravity. Accordingly, BMW used carbon-fiber reinforced material – a particularly light and extremely rigid high-tech composite – in the roof of the M3 Coupe, to lower the vehicle's center of gravity. And when combined with the M3's near-perfect 50/50 balance front and rear, the advantages of lighter weight and a lower center of gravity become obvious in the M3's powerful drive, high-revving pickup, improved roadholding and shorter braking distances.

The roof of the BMW M3 Coupe is made of carbon-fiber-reinforced material, which is both light and very stiff.

BMW's use of intelligent lightweight construction: track control arms and dampers on the rear axle are made from lightweight aluminum, as is the load-through. The rear bumper carrier is made of a composite material, long-fiber thermoplastic. Perforated compound brake discs also contribute towards a reduction in weight.

The front bumper carriers, which are made from composite material, and the double-joint spring-strut front axle, constructed from aluminum, are as important to the overall lightweight concept as the aluminum hood.

## Green Hell on the Nürburgring, Paradise for our engineers.

A BMW engineer's log while testing the M3 on the Nürburgring's Nordschleife:

Tuesday morning, 9:13 am, air temperature 58° Fahrenheit. Dry asphalt, a cloudy sky. Press the Start/Stop button briefly, and the high-speed V-8 induction engine springs to life. A glance at the instrument panel. A glance at the route. Concentrate and: go!

The BMW M3 powers away with a turbine-like power delivery. Then: Hatzenbach. The first bend on the Nordschleife is unsparing as it lays bare the vehicle's suspension characteristics. Steer sharply to the right and then to the left. It'll need a lot more than that to bring this aluminum chassis off track. The BMW M3 takes the bend neutrally and accurately.

Onward, up the Quiddelbacher-Höhe. The road is narrow and undulating. The BMW M3 speeds up to 124 mph, the engine powers on ceaselessly. Upsurge: minimal. The aerodynamics molds itself around the vehicle like the M seat around the driver. After Flugplatz and Schwedenkreuz, the first tough braking area by Aremberg—and after that, top speed down the Fuchsröhre. The build: extremely torsion-stiff and bend-resistant. Fourth mile. Adenauer-Forst. Precise, rapid load change at the limit. Road section Breidscheid: the cloud cover cracks open, the high-performance compound brakes glow—but stay steady.

Now to the right, up the Ex-Mühle. The V-8 powerplant revs up, the cooling system shows no sign of strain. The BMW M3

effortlessly climbs the steep incline up to Bergwerk, on over Kesselchen towards the legendary steep section: formidable driving stability—the Variable M Differential Lock performs brilliantly. Then into the Caracciola-Karussell's 180-degree banked turn: straining right to the limit—particularly the wheel suspension.

On over Wippermann. The handling is almost playful. To Pflanzgarten. Taut, but not tough—the spring and damper tuning. Finally Antoniusbuche, a long stretch, top speed 155 mph, the road studded with bumps. Superb longitudinal dynamics. Then the finish line is in sight. Hands tremble. The new BMW M3 falls silent. The V-8 engine crackles softly.

# One letter. One number. One legend: M3.

The very first BMW M – the legendary M1 – shot straight to the top in 1978 as one of the fastest German road-going sports cars. And once BMW M tasted success, they never wanted to give it up.

Uncompromising and practical, with exceptional quality down to the smallest detail, M Cars offer BMW Motorsport technology in a production vehicle. For over three decades, M Cars have been created for those who view outstanding achievement as an everyday occurrence.

The BMW M3 made its initial debut in 1987, and from the very beginning, its performance was unrivaled. With a 192-hp, 16-valve, four-cylinder engine, the M3 legend was created. The second BMW M3 was launched in 1995, a milestone distinguished by its 240 hp and array of technological highlights.

In 2001, the third-generation BMW M3 set the benchmark for combining the thrill of motorsport and everyday functionality. At its heart was a high-revving, 333-hp, six-cylinder engine. And today, the 414-hp, V-8 M3 continues the BMW M tradition.

The engine, transmission, suspension and aerodynamics are all in perfect harmony. This powerful high-rev concept with its unique lightweight technology transfers motorsport innovation directly to the road.

That's why BMW M develops and tests its cars on the notorious Nürburgring Nordschleife. This is where racing legends – and cars that carry the M name – are born. BMW M: inspirational vehicles that are prized on the race circuit – and on the road home.

The pages in this section show available colors and materials for the BMW M3 models. Use these samples to compare paint, upholstery, trim colors and combinations. Please note that these samples are

representations; they are not exact reproductions. To see the actual colors, visit your local BMW center. They will be happy to show you original samples and assist you with special requests.

## BMW European Delivery: Save money and drive your new BMW on the roads it was designed for.

The new **BMW Welt** ( BMW World ) delivery and brand-experience center in Munich is bold proof of BMW's passion for design. When you take advantage of the BMW European Delivery Program,<sup>1</sup> this is where you will meet your new BMW in a personalized process that is highly dramatic and totally unforgettable. (You might also realize substantial savings that just may pay for your trip.) While you're there, marvel at the historic BMWs in the Museum; learn about our engineers' newest innovations in the Technology and Design Atelier; and take a tour of the plant to experience firsthand the state-of-the-art methods used to create a BMW. Then comes the unique experience of driving your new BMW on the roads it was designed for. To learn more, visit [bmwusa.com/europeandelivery](http://bmwusa.com/europeandelivery).

### BMW Ultimate Service.™

At BMW, we believe that a premium ownership experience should feature performance and luxury, as well as safety and convenience. We believe you should be able to drive a BMW to its potential, while enjoying peace of mind and reduced cost of ownership. That's the idea behind BMW Ultimate Service: a suite of comprehensive programs and services that are included in every 2009 and later model year vehicle. The New Vehicle Limited Warranty, the BMW Maintenance Program, and Roadside Assistance come standard, with BMW Assist™ offered as an option. BMW Ultimate Service starts with the **New Vehicle Limited Warranty**, providing you with coverage for the first four years or 50,000 miles, whichever comes first. Additionally, you have 12-year, unlimited-mileage warranty protection against corrosion and rust perforation.<sup>2</sup> **BMW Maintenance Program** is one of the most comprehensive maintenance programs in its class. We cover all factory-recommended maintenance during the New Vehicle Limited Warranty coverage period. This includes scheduled oil services and inspections. Also covered is the replacement of items that are subject to normal wear and tear, such as brake pads, wiper blade inserts and engine drive belts.<sup>3</sup> And, thanks to BMW's advanced engineering, most owners enjoy a well-balanced maintenance schedule, with flexible routine service intervals that can save you time. When your vehicle requires attention, your authorized BMW or BMW SAV® center ensures that it receives only genuine BMW parts—your assurance of exacting quality standards.

**BMW Roadside Assistance** is provided free of charge for the first four years—with no mileage limit. Call **1-800-332-4BMW (4269)** for friendly on-the-road help, 24/7, anywhere in the United States, Canada and Puerto Rico. This includes everything from flat-tire changes, emergency gasoline and lock-out service, to towing, alternative transportation and even trip-interruption benefits. This service also provides valuable trip-routing advice.

The **BMW Assist™** Safety Plan<sup>4</sup> is an optional four-year program. You'll enjoy peace of mind knowing that a friendly response specialist is there to help you, 24/7, at just the push of a button. The Safety Plan includes Automatic Collision Notification, Emergency Request, Enhanced Roadside Assistance, Door Unlock, Stolen Vehicle Recovery and Customer Relations. MyInfo allows you to send business locations and street addresses with their associated phone numbers from the Google Maps™ website directly to your BMW. The destination can be sent to your Navigation system for turn-by-turn directions, and you can call the destination via your Bluetooth® linked cell phone. And for the ultimate in coverage, add the optional **Convenience Plan**.<sup>5</sup> You'll enjoy unlimited access to personalized Directions, Traffic and Weather reports, as well as our Concierge feature, which can send a destination address and phone number, such as a restaurant or hotel, right to your BMW. You can make up to four operator-assisted calls per year with Critical Calling if your cell phone is not available, or if its battery is discharged. BMW Search™ allows online access to up-to-date fuel prices and the latest weather forecasts, as well as Bloomberg's stock indices and the powerful reach of the Google Maps database—delivered to the iDrive display right inside your vehicle.

BMW's unique **TeleService**, included in the BMW Assist Safety Plan, continually monitors specific parts that are subject to wear and tear—including the engine oil, micro-filter, spark plugs, brake linings and various fluids—as well as services that require attention at regular intervals, such as vehicle service inspections. This data is automatically transmitted to your BMW center, which will then call you to schedule a service appointment. You don't have to keep track of when your vehicle requires routine maintenance. An added benefit: any needed maintenance service parts will already be on hand, so your BMW is serviced and returned to you as quickly as possible.

**BMW and the environment.**

BMW is a strong proponent of the environment and social responsibility. It is important to manage the earth's resources responsibly, and not jeopardize the needs of future generations. That is why BMW makes vehicles that minimize adverse environmental impact, from production (pollution prevention and waste minimization at the plant) through owner use (low emissions) to eventual disposal (easy drainability of all fluid-related components and easy neutralization of all pyrotechnic devices).

This effort has been recognized worldwide, and as a result, we are pleased to have received numerous environmental honors. In the U.S., for example, the Environmental Protection Agency accepted BMW's Spartanburg, SC production and manufacturing facility as a charter member of the agency's National Environmental Performance Track. Internationally, BMW AG—the parent company of both BMW of North America and BMW Manufacturing Co., Spartanburg, SC—was the first automotive company to be represented on the Dow Jones Sustainability Group Index, and has remained on the Index ever since. At BMW, we strive for high performance in everything we do.
